

QUALITY POLICY

Working with Quality is a strategic element for Movimotor. To that end it is handled a Quality System consistent with the regulatory requirements

UNI EN ISO 9001:2015

Having Movimotor defined its **context** and **risk assessment** (threats and opportunities) to achieve its long-term success.

Movimotor wants to become a supplier who can be considered a partner by the customer, so **the element “customer satisfaction” is strategic.**

Movimotor identifies the following factors for success:

- Quality in product and customer service
- Achievement of a satisfactory profitability for shareholders and for the future of the company
- Ability to create a culture and a way of thinking oriented to quality inside the company
- Continuous search for innovative solutions, which enable the company to achieve better quality levels with competitive costs and in the requested timing
- Identification of appropriate improvement actions for the attainment of company goals
- To ensure an ongoing relationship with strategic product suppliers

During the Management reassessment, the company analyzes the current context, defines the goals of success and considers the actions to be taken to avoid the threats and achieve the opportunities identified.

Movimotor Srl, being aware of its importance, pursues a policy of security in the workplace and of respect of environment in accordance with the current regulations.

The entire staff has to be involved in the Quality Policy. Therefore, this has to be spread so that everybody can be acquainted with it.

The sole director
